PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Rohnert Park

6400 State Farm Drive
Rohnert Park, California 94928

Report Date: September 5, 2017
Partner Project No. 17-193582.2

Prepared for:

Laulima Development

111 Pine Street, Suite 1315
San Francisco, California 94104

September 5, 2017

Mr. David Bouquillon
Laulima Development
111 Pine Street, Suite 1315
San Francisco, California 94104

Subject: Phase I Environmental Site Assessment
Rohnert Park
6400 State Farm Drive
Rohnert Park, California 94928
Partner Project No. 17-193582.2

Dear Mr. Bouquillon:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (619) 925-9672 or MLambson@partneresi.com.

Sincerely,

Mark Lambson
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Laulima Development for the property located at 6400 State Farm Drive in the City of Rohnert Park, Sonoma County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Laulima Development with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of State Farm Drive between Rohnert Park Expressway and Enterprise Drive within a mixed commercial and residential area of Sonoma County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	6400 State Farm Drive, Rohnert Park, California
Property Use:	Office (unoccupied)
Land Acreage (Ac):	29.88 Ac
Number of Buildings:	One
Number of Floors:	One
Gross Building Area (SF):	283,230 SF
Net Rentable Area (SF):	283,230 SF
Date of Construction:	1976-77
Assessor's Parcel Number (APN):	143-051-072
Type of Construction:	Concrete tilt-up and block
Current Tenants:	Unoccupied (formerly State Farm Insurance)
Site Assessment Performed By:	Michael Audibert, REPA
Site Assessment Conducted On:	August 30, 2017

The subject property is currently unoccupied. The building was most recently occupied by State Farm Insurance for commercial (office) use which vacated in 2011. Onsite operations most recently consisted of general office activities. Hazardous substances and petroleum products used/stored onsite include various paints and cleansers, as well as small amounts of lubricants and anti-corrosion chemicals for chillers/cooling towers. In addition to the current structure, the subject property is also improved with a pump house, security kiosks, solid waste dumpster enclosures, asphalt-paved parking areas, and associated landscaping.

According to available historical sources, the subject property consisted of unimproved and/or agricultural land as early as 1916 through 1973. In 1976, the current office building was constructed and since that time, the subject property has been occupied by State Farm Insurance. State Farm Insurance vacated the building in 2011 and it has remained unoccupied since that time.

The immediately surrounding properties consist of an office building, the Rohnert Park-Cotati Regional Library, and the Rohnert Park Police Department across Rohnert Park Expressway to the north; the SMART

Train railway and a mobile home park across Seed Farm Drive to the east; apartment complexes across Enterprise Drive to the south; and a retail shopping development across State Farm Drive to the west.

According to groundwater monitoring data for an adjacent property site (600 Enterprise Drive), the depth and direction of groundwater in the vicinity of the subject property is inferred to be approximately 8 to 10 feet below ground surface (bgs) and flow toward the west-southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- The subject property, identified as State Farm Insurance at 6400 State Farm Drive, is listed on various UST databases due to the former presence of diesel and gasoline USTs onsite. In 1993, two 12,000-gallon diesel USTs and one 12,000-gallon gasoline UST were removed from the site. During the removal of the northernmost 12,000-gallon diesel UST, the tank collapsed and separated. Approximately 20 to 50 gallons of diesel fuel remained in the tank which mixed with the surrounding pea gravel. Approximately 150 cubic yards of pea gravel mixed with diesel fuel was removed from the site. Eight soil samples were then collected from beneath the tank excavation and beneath the gasoline fuel product piping. Additional impacted soil was excavated and removed from the site. A total of 216 cubic yards of impacted soil was removed from the site. The SCEHD subsequently issued a closure letter regarding the former USTs on August 9, 1994. Based on the findings of a Phase I ESA performed by Leighton & Associates in December 2012, it was recommended that further investigation of the USTs was necessary to determine whether vapor intrusion would be an issue. In October 2013, a total of five soil borings were advanced and

soil, groundwater, and soil vapor samples were collected. Very low concentrations of TPH-g and TPH-d were detected in soil and groundwater. Soil vapor levels were determined to be below DTSC screening levels, and no further investigation was recommended. As such, the former USTs are considered an historical recognized environmental condition (HREC) for the purposes of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Following the removal of the former diesel and gasoline USTs from the site, the product pipeline from the diesel UST to the boiler room was capped and left in place. The former presence of the fuel tanks has been issued case closure by the local regulatory agency. However, during redevelopment, it is recommended that the pipeline be exposed and be properly disposed of. Based on observations made during this process, it may be necessary to collect soil samples from beneath the pipeline to rule out any release/subsurface impact.
- Although not observed during our current assessment, according to a prior Phase I ESA from 2012, two manhole covers were observed within the former estimation and machining room. It is recommended that during redevelopment, the manhole covers be opened and inspected to rule out the presence of a sub-grade feature such as an oil/water clarifier. If such a feature was to be discovered, it may be necessary to remove the feature and collect soil samples from beneath the feature to rule out any release/subsurface impact.
- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 6400 State Farm Drive in the City of Rohnert Park, Sonoma County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 6400 State Farm Drive in the City of Rohnert Park, Sonoma County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Laulima Development engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Laulima Development. Either

verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at <http://www.partneresi.com/terms-and-conditions.php>.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, and a title search. This information was not provided at the time of the assessment.
- Partner submitted a Freedom of Information Act (FOIA) request to the Sonoma County Environmental Health Department (SCEHD) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 6400 State Farm Drive in Rohnert Park, California is located on the east side of State Farm Drive between Rohnert Park Expressway and Enterprise Drive. According to the Sonoma County Assessor, the subject property is legally described as APN 143-051-072, and ownership is currently vested in North Bay Community LLC since 2015.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently unoccupied (former occupied by State Farm Insurance for commercial office use). Onsite operations most recently consisted of general office activities. Hazardous substances and petroleum products used/stored onsite include various paints and cleansers, as well as small amounts of lubricants and anti-corrosion chemicals for chillers/cooling towers. The subject property consists of one single-story building located in the central portion of the property. In addition to the current structure, the subject property is also improved with a pump house, security kiosks, solid waste dumpster enclosures, asphalt-paved parking areas, and associated landscaping.

The subject property is designated for commercial development by the City of Rohnert Park.

The subject property was identified as a UST, HIST UST, SWEEPS UST, CA FID UST, CUPA Listings, EMI, FINDS, ECHO, RCRA-NonGen/NLR, and HAZNET site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Sonoma County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North:	Rohnert Park Expressway, followed by an office building, the Rohnert Park-Cotati Regional Library, and the Rohnert Park Police Station (6250 State Farm Drive, 6250 Lynne Conde Way, and 500 City Center Drive)
South:	Willow Creek Apartments and Crossbrook Apartments (471-629 and 655 Enterprise Drive)
East:	The Rohnert Park Corporation Yard (600 Enterprise Drive), as well as Seed Farm Drive and the SMART Train railway, followed by a mobile home park (6401 Country Club Drive)
West:	The Raley's Town Center Shopping Development (10-640 Raley's Town Center, 6301, 6435 & 6457 State Farm Drive) and apartments (300 Enterprise Drive)
Northwest:	Intersection of Rohnert Park Expressway and State Farm Drive, followed by a West America Bank (300/302 Rohnert Park Expressway)

An adjacent property to the north (500 City Hall Drive/City Center Drive) was identified as a CUPA Listings site in the regulatory database report of Section 4.2. An adjacent property to the east (600 Enterprise Drive) was identified as an Envirostor, LUST, UST, HIST UST, HIST CORTESE, PEST LIC, and CUPA Listings site in the regulatory database report of Section 4.2. An adjacent property to the west (10/60 Raley's Town Center) was identified as a SLIC, FINDS, DRYCLEANERS, and EDR Hist Cleaner site in the regulatory database of Section 4.2. Various other addresses associated with the larger commercial shopping development to the west were also identified in various non-release databases, including RCRA-SQG, FINDS, ECHO, and CUPA Listings in the regulatory database of Section 4.2. The adjacent property to the northwest (300-302 Rohnert Park Expressway) was identified as a LUST, SWEEPS UST, CA FID UST, HIST CORTESE, EDR Hist Auto, and Notify 65 site in the regulatory database of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Cotati, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 100 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west. The subject property is depicted on the 1980 map as developed with the current commercial building.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the northwest. The nearest surface water in the vicinity of the subject property is Hinebaugh Creek located approximately 850 feet to the north of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Sonoma County Water Authority (SCWA) serves the subject property vicinity. According to a representative of the SCWA, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Rohnert Park are surface water from various reservoirs associated with the Russian River watershed.

According to groundwater monitoring data for an adjacent property site (600 Enterprise Drive), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 8 to 10 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the California coast Range physiographic province of the State of California. The uppermost geologic formation underlying the soils at the subject property is the Cenozoic Age sedimentary formation.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Yolo clay loam. The Yolo series is a member of the fine-silty, mixed, thermic family of Mollic Haploxeralfs. Typically, Yolo soils have grayish brown, slightly acid loam A horizons; brown silty clay loam, neutral Bt horizons; and yellowish brown C horizons. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06097C0877E, dated December 2, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
Circa 1916 – 1973	Aerial Photographs, Topographic Maps	Consisted of unimproved and/or agricultural land
Circa 1976 – present	Aerial Photographs, Topographic Maps, Agency Records, City Directories, Interview, Onsite Observations	Developed with the current office building and occupied by State Farm Insurance

According to available historical sources, the subject property consisted of unimproved and/or agricultural land as early as 1916 through 1973. In 1976, the current office building was constructed and since that time, the subject property has been occupied by State Farm Insurance. State Farm Insurance vacated the building in 2011 and it has remained unoccupied since that time.

The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on August 28, 2017. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	1942, 1952	Scale:	1"=500'
Subject Property:	Appears to consist of agricultural land		
North:	Agricultural land		
South:	Agricultural land		
East:	A railroad, followed by agricultural land		
West:	Agricultural land		

Date:	1968	Scale:	1"=500'
Subject Property:	Appears to consist of agricultural land		

Date:	1968	Scale:	1"=500'
North:	Rohnert Park Expressway, followed by agricultural land		
South:	Agricultural land		
East:	A railroad, followed by agricultural land		
West:	Agricultural land		

Date:	1973	Scale:	1"=500'
Subject Property:	Appears to consist of agricultural land		
North:	Rohnert Park Expressway, followed by agricultural land		
South:	Agricultural land

West:	Current retail shopping development		
Northwest:	Intersection, followed by the current bank building		

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on August 28, 2017. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on March 7, 2017 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 6400 State Farm Drive (Subject Property)

Year(s)	Occupant Listed
1977	State Farm Auto Insurance (6400 State Farm Drive)
1982	State Farm Auto Insurance, State Farm Fire & Casualty Co. (6400 State Farm Drive)
1987	State Farm Auto Insurance, State Farm Fire & Casualty Co., State Farm North (6400 State Farm Drive)
1992	Servomation 153, State Farm Fire & Casualty Co., State Farm Northern California (6400 State Farm Drive)
1995	State Farm Fire & Casualty Co., State Farm Mutual Auto Insurance Co., State Farm North (6400 State Farm Drive)
2000	State Farm Mutual Auto Insurance Co., State Farm Northern California Federal Credit (6400 State Farm Drive)
2005, 2010, 2014	State Farm California Federal Credit, State Farm Fire & Casualty Co. (6400 State Farm Drive)

According to the city directory review, the subject property had been occupied by the State Farm Insurance offices since at least 1977. Based on the city directory review, no environmentally sensitive listings were identified for the subject property address.

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1977- 2014	Various office and retail tenants, including Brunners Cleaners in 1982 at 6435 State Farm Drive

Former and current dry-cleaning facilities on the adjacent property to the west are discussed further in Section 4.2.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on March 6, 2017. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1916,
1944,
1954,
1968

Subject Property: Depicted as unimproved land
North: Unimproved land

Date: 1916,
1944,
1954,
1968

South: Unimproved land
East: The Northwestern Pacific railroad, followed by unimproved land
West: Unimproved land

Date: 1973

Subject Property: Depicted as unimproved land
North: Unimproved land
South: Unimproved land
East: The Northwestern Pacific railroad, followed by the current mobile home park
West: Unimproved land

Date: 1980

Subject Property: Depicted as developed with the current commercial building
North: Rohnert Park Expressway, followed by Unimproved land
South: Enterprise Drive, followed by unimproved land
East: The current corporation yard building, as well as the Northwestern Pacific railroad, followed by the current mobile home park
West: Unimproved land

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency:	California Environmental Protection Agency (EPA)
Point of Contact:	Online Database
Agency Address:	N/A
Agency Phone Number:	N/A
Date of Contact:	August 24, 2017
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the California EPA.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency:	Sonoma County Environmental Health Department (SCEHD)
Point of Contact:	Esmeraldo Pulido
Agency Address:	625 5 th Street, Rohnert Park, CA
Agency Phone Number:	(707) 565-6565
Date of Contact:	August 24, 2017
Method of Communication:	Faxed Request
Summary of Communication:	As of the date of this report, Partner has not received a response from the SCEHD for inclusion in this report. Records reviewed from the SCEHD as part of a prior environmental assessment (2013) are summarized in Section 5.2.6.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency:	Rohnert Park Fire Department (RPFDD)
Point of Contact:	Records Manager
Agency Address:	500 City Center Drive, Rohnert Park, California
Agency Phone Number:	(707) 584-2600
Date of Contact:	August 24, 2017
Method of Communication:	Telephone
Summary of Communication:	The RPFDD referred Partner to the SCEHD for information regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	Bay Area Air Quality Management District (BAAQMD)
Point of Contact:	Online Database
Agency Address:	N/A
Agency Phone Number:	N/A
Date of Contact:	August 24, 2017
Method of Communication:	Online
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the BAAQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	Online Database
Agency Address:	N/A
Agency Phone Number:	N/A
Date of Contact:	August 24, 2017
Method of Communication:	Online
Summary of Communication:	According to the RWQCB GeoTracker Database, the subject property, identified as State Farm Insurance Company, is identified as a permitted UST site. Additional information regarding former USTs onsite is presented in Section 4.2.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	Online Database
Agency Address:	N/A
Agency Phone Number:	N/A
Date of Contact:	August 24, 2017
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC.

4.1.7 Building Department

Regulatory Agency Data

Name of Agency:	Rohnert Park Building Department (RPBD)
------------------------	---

Regulatory Agency Data

Point of Contact: Records Manager
Agency Address: 130 Avram Avenue, Rohnert Park, California
Agency Phone Number: (707) 588-2239
Date of Contact: August 30, 2017
Method of Communication: In Person
Summary of Communication: Records were available for review, as further discussed in the following table.

Building Records Reviewed for 6400 State Farm Drive (Subject Property)

Year(s)	Owner/Applicant	Description
1975	State Farm Insurance	Letter approving installation of USTs and a water well onsite
1976	State Farm Insurance	Construction permit for a 168,550 foot building
1980	State Farm Insurance	Permit for addition to building
1981	State Farm Insurance	Permit for addition of an accessory building
1994	State Farm Insurance	Permit to install a 500-gallon diesel AST
1994	State Farm Insurance	Permit to install shed for pump house
1995	State Farm Insurance	Permit to move kitchen location
1996	State Farm Insurance	Tenant improvements for onsite food service and offices
1999	State Farm Insurance	Permit to convert data processing area to general offices
2006	State Farm Insurance	Re-roof
2007	State Farm Insurance	Replace water pump near cooling tower and replace cooling tower
2010	State Farm Insurance	Replace boiler unit

A copy of pertinent documents is not included in Appendix B of this report.

4.1.8 Planning Department

Regulatory Agency Data

Name of Agency: Rohnert Park Planning Department (RPPD)
Point of Contact: Records Manager
Agency Address: 130 Avram Avenue, Rohnert Park, California
Agency Phone Number: (707) 588-2226
Date of Contact: August 30, 2017
Method of Communication: In Person
Summary of Communication: According to records reviewed, the subject property is zoned for commercial use by the City of Rohnert Park. The site has been used for office purposes since 1977.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency: California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact: Online Database
Agency Address: N/A
Agency Phone Number: N/A

Regulatory Agency Data

Date of Contact: August 24, 2017
Method of Communication: Online
Summary of Communication: According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data

Name of Agency: Sonoma County Assessor (SCA)
Point of Contact: Online Database
Agency Address: N/A
Agency Phone Number: (N/A)
Date of Contact: August 24, 2017
Method of Communication: Online
Summary of Communication: According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 143-051-072 and is currently owned by North Bay Community LLC since 2015. The subject property parcel consists of 29.88 acres and is improved with a 283,230 square foot office building.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N

Radius Report Data

Federal RCRA TSD Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	Y	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
CHMIRS	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	Y	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST)	0.50	N	Y	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	Y	Y	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
WDS	Varies	N	N	N
EMI	Varies	Y	N	N
HAZNET	Varies	Y	N	N
CUPA Listings	Varies	Y	Y	N
EDR US Hist Auto Station	Varies	N	Y	N
EDR US Hist Cleaners	Varies	N	Y	N

4.2.2 Subject Property Listings

The subject property was identified as a UST, HIST UST, SWEEPS UST, CA FID UST, CUPA Listings, EMI, FINDS, ECHO, RCRA-NonGen/NLR, and HAZNET site in the regulatory database report, as discussed below:

- The subject property, identified as State Farm Insurance at 6400 State Farm Drive, is listed on various UST databases due to the former presence of diesel and gasoline USTs onsite. In 1993, two 12,000-gallon diesel USTs and one 12,000-gallon gasoline UST were removed from the site. During the removal of the northernmost 12,000-gallon diesel UST, the tank collapsed and separated. Approximately 20 to 50 gallons of diesel fuel remained in the tank which mixed with the surrounding pea gravel. Approximately 150 cubic yards of pea gravel mixed with diesel fuel was removed from the site. Eight soil samples were then collected from beneath the tank excavation and beneath the gasoline fuel product piping. Additional impacted soil was excavated and removed from the site. A total of 216 cubic yards of impacted soil was removed from the site. The SCEHD subsequently issued a closure letter regarding the former USTs on August 9, 1994. Based on the findings of a Phase I ESA performed by Leighton & Associates in December 2012, it was recommended that further investigation of the USTs was necessary to determine whether vapor intrusion would be an issue. In October 2013, a total of five soil borings were advanced and

soil, groundwater, and soil vapor samples were collected. Very low concentrations of TPH-g and TPH-d were detected in soil and groundwater. Soil vapor levels were determined to be below DTSC screening levels, and no further investigation was recommended. As such, the former USTs are considered an historical recognized environmental condition (HREC) for the purposes of this assessment.

- The subject property is also listed as a HAZNET site due to the generation of hazardous waste in the form of laboratory waste chemicals, other inorganic solid waste, photo-chemicals/photo-processing waste, and asbestos containing waste. The CUPA Listings identification is due to the current presence of a diesel AST onsite. The EMI listing refers to the presence of an emergency generator onsite. No violations or release incidents were reported in association with these listings. Based on the lack of a reported release, and the current regulatory status, these listings are not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

An adjacent property to the north (500 City Hall Drive/City Center Drive) was identified as a CUPA Listings site in the regulatory database report. An adjacent property to the east (600 Enterprise Drive) was identified as an Envirostor, LUST, UST, HIST UST, HIST CORTESE, PEST LIC, and CUPA Listings site in the regulatory database report. An adjacent property to the west (10/60 Raley's Town Center) was identified as a SLIC, FINDS, DRYCLEANERS, and EDR Hist Cleaner site in the regulatory database. Various other addresses associated with the larger commercial shopping development to the west were also identified in various non-release databases, including RCRA-SQG, FINDS, ECHO, and CUPA Listings in the regulatory database. The adjacent property to the northwest (300/302 Rohnert Park Expressway) was identified as a LUST, SWEEPS UST, CA FID UST, HIST CORTESE, EDR Hist Auto, and Notify 65 site in the regulatory database. These sites are discussed below:

- The property, identified as Rohnert Park Corporation Yard at 600 Enterprise Drive, is located adjacent to the southeast of the subject property. This site is listed as an Envirostor and LUST site due to a release of gasoline that reportedly impacted soil and the aquifer used for the drinking water supply. The release was discovered in 1990 during the removal of two USTs. At the time of tank removal, 1,500 cubic yards of impacted soil was removed from the site. Several groundwater monitoring wells were installed onsite. Approximately 4,500 gallons of groundwater was pumped from the excavation and disposed of. High Vacuum Dual Phase Extraction (DPE) occurred from November to December 2014. Approximately 730 pounds of hydrocarbon vapor was removed during this process. The site was issued a Case Closed status by the Sonoma County Local Oversight Program (LOP) on February 17, 2017. In addition, the subject property conducted soil, groundwater, and soil vapor sampling adjacent to this site to rule out any migration to the subject property. It was concluded that no further action was necessary regarding this adjacent site. Based on this information, and the current regulatory status, this adjacent site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

- The property, identified as Raley's Towne Centre Cleaners at 60 Raleys Towne Center, is located adjacent to the west of the subject property. This site is listed as a SLIC site due to an unauthorized release of PCE that reportedly has impacted the aquifer used for the drinking water supply, indoor air, soil, and soil vapor. The site has a current regulatory status of "Open – Site Assessment" as of April 7, 2017. Various listings regarding historical and current dry-cleaning facilities were identified in the regulatory database under the addresses of 10760 Raleys Towne Center and 6435 State Farm Drive; however, the Raley's Towne Centre Cleaners site is the only site listed as a release site. Based on the ongoing regulatory oversight, and the estimated direction of groundwater flow, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.
- Various additional properties adjacent to the west that are a part of the larger commercial retail shopping development were listed in various databases, including RCRA-SQG, FINDS, ECHO, and CUPA Listings at the following addresses: 40 Raleys Towne Center, 100 Raleys Towne Center, and 6457 State Farm Drive. These listings are in general associated with the handling of hazardous and/or the generation of small quantities of hazardous waste. None of these database listings are release listings, and no release incidents have been reported in association with these listings. Based on the lack of a reported release, and the estimated direction of groundwater flow, these listings/sites are not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for these sites would alter the findings of this assessment.
- The property, identified as Chevron USA at 300/302 Rohnert Park Expressway, is located adjacent to the northwest of the subject property. This site is listed as a LUST site due to an unauthorized release of gasoline that reportedly impacted the aquifer used for the drinking water supply. In 1996, the product lines and dispenser islands were replaced, revealing the subsurface impact. Impacted soil was excavated and removed from the site and ten groundwater monitoring wells were installed. Groundwater monitoring continued through 2007. The site was issued a Case Closed status by the Sonoma County LOP on February 13, 2013. Based on the current regulatory status, and the estimated direction of groundwater flow, this adjacent site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.
- The property, identified as Public Safety Main Fire Station at 500 City Hall Drive, is located adjacent to the north of the subject property. This site is listed as a CUPA Listings site due to the maintenance of a Hazardous Materials Business Plan (HMBP) with the County of Sonoma. The site reportedly has an AST onsite. No violations or release incidents have been reported for this site or in association with this regulatory database listing. Based on the lack of a reported release, and the current regulatory status, this adjacent site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

4.2.5 Orphan Listings

No orphan listings are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Laulima Development (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		X		
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3		X	
Reason for Performing Phase I ESA	Section 1.1	X		
Prior Environmental Reports	Section 5.2.6		X	
Other				X

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2015, identified as North Bay Community LLC, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

Mr. David Bouquillon, key site manager, indicated that he information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Bouquillon, to his knowledge, there are no USTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

According to a Preliminary Title Report, the subject property is currently owned by North Bay Community LLC.

Partner was not provided with environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment, Leighton & Associates (December 4, 2012)

Leighton & Associates (Leighton) prepared this report on behalf of JNI LLC. The assessment was performed in general accordance with ASTM Standard E1527-05. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state and local regulatory databases. Pertinent information contained in this report is summarized below:

At the time of the 2012 assessment, the subject property was developed as it is today and unoccupied (as it is today).

Based on Leighton's assessment, the following Findings/Opinions were reported:

- The subject site was apparently been utilized for agricultural purposes from at least 1953 sometime before 1987. It is not known if pesticides were used in agricultural operations that occurred on the subject site. Leighton recommends collecting soil samples to assess whether the site has been impacted by pesticides or rodenticides.
- Three former USTs were removed under oversight of the SCEHD and were issued closure in 1994. However, the soil samples collected during UST removal and cleanup activities were not analyzed for MTBE or other oxygenates. The quality of the groundwater has not been assessed in the area of the former tanks. Leighton recommends assessing the soil and groundwater for potential impacts associate with the former tanks.
- An abandoned fuel oil (diesel) pipe extending from the boiler room to the location of the former USTs has not been investigation. The piping system should be exposed, flushed, and property disposed. It may be prudent to collect soil samples beneath the pipeline.
- A 500-gallon AST and associated day tank appeared to be in good condition.
- Leighton recommends removal of the AST, day tank, and piping system in accordance with regulatory guidelines prior to demolishing the building.
- Leighton recommends additional inspection of the sewer drain and pipe associated with a former photo processing area to determine if any subsurface impacts have occurred.

- If the onsite irrigation water well is no longer used, the well should be abandoned in accordance with regulatory guidelines.
- Two manholes were observed in the estimation and machining room. The purpose of these manholes is not known. The manholes should be opened and inspected to assess potential impacts prior to, or during demolition activities.
- Leighton recommends soil gas sampling near the adjacent LUST facility to assess whether potential contaminants may be migrating onto the subject site.

Based on the Findings/Opinions summarized above, Leighton identified the following RECs and issued associated recommendations:

- Collect soil samples to assess potential organochlorine pesticides and heavy metals in soil that may have resulted from former agricultural use of the subject site.
- Inspection of the sewer drain and pipe associated with the photo processing area using a camera or monitor soil beneath the sewer lines to assess potential impacts that may have resulted from photo processing chemicals and heavy metals used in former photo developing and microfiche operations.
- Collect soil and groundwater samples to a maximum depth of 15 feet below ground surface and install of vapor probes at 5 feet below ground surface adjacent to the location of the former gasoline UST for analysis of TPH and VOC; to including oxygenates, especially MTBE.
- Fuel piping abandoned in place – Piping should be exposed, flushed and properly disposed. Soil samples should be collected beneath the abandoned pipeline after they have been exposed, flushed, and removed.
- Install of two vapor probes near the adjacent City of Rohnert Park corporate park assess potential chemicals of concern that may be migrating onto the subject site from the adjacent LUST cleanup area.
- The following potential RECs were also identified:
 - Two manholes were observed in the estimation and machining room. The purpose of these manholes is not known.
 - A groundwater well is located onsite and used for irrigation.
 - The grease trap/interceptor should be removed in accordance with regulatory guidelines.
 - Observations should be made during the demolition of the chiller/boiler area for impacts to the subsurface.
 - Hazardous materials located onsite should be removed and disposed of in accordance with regulatory guidelines.
 - A hazardous materials survey should be conducted to quantify any asbestos containing materials, lead-based paint, and universal waste located onsite. In general, observations should be made during future property development for areas of possible contamination such as, but not limited to, the presence of underground facilities, buried debris, waste drums, and tanks, stained soil or odorous soils. Should such materials be encountered, further investigation and analysis may be necessary at that time.

Phase I Environmental Site Assessment, Leighton & Associates (December 20, 2013)

Leighton & Associates (Leighton) prepared this report on behalf of JNI LLC and North Bay Community LLC. The assessment was performed in general accordance with ASTM Standard E1527-05 and E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state and local regulatory databases. Pertinent information contained in this report is summarized below:

At the time of the 2012 assessment, the subject property was developed as it is today and unoccupied (as it is today). This reassessment of the subject property was performed following a Limited Phase II Subsurface Investigation performed by Kleinfelder in October 2013 to address some of the findings that Leighton revealed in their December 2012 Phase I ESA.

A summary of Kleinfelder's subsurface investigation results is provided below:

- Former Agricultural Use: Six hand auger borings were advanced to depths of 3.5 feet bgs in six random locations throughout the subject site to assess for organochlorine pesticides (OCPs). Soil samples were collected at depths of 0.5 to 1, 1.5 to 2, and 3 to 3.5 feet bgs. The 18 soil samples were analyzed for OCPs by EPA Method 8081 and California Code of Regulations Title 22 metals (also known as CAM 17 metals).
- Alpha and gamma chlordane was detected in soil sample SS2-3.0. DDT, DDE, and DDD were detected in three of the 18 soil samples collected above their respective laboratory reporting limits. The concentrations of alpha and gamma chlordane, DDT, DDE, and DDD were below Regional Screening Levels (RSLs) for residential soil established by the United States Environmental Protection Agency (USEPA) Region 9 (USEPA, May 2013). OCPs were not detected in 17 soil samples. Leighton also compared the results to the Office of Environmental Health Hazard (OEHHA) California Human Health Screening Levels (CHHSLs) for residential soil; the concentrations of OCPs were also below the established CHHSLs (OEHHA, 2010). The 18 soil samples were also analyzed for CAM 17 metals. CAM 17 metals were reported above laboratory reporting limits in the soil samples. CAM 17 metals, except arsenic, were below the respective residential RSLs and CHHSLs. Arsenic concentrations ranged from 0.90 milligrams per kilogram (mg/kg) to 4.6 mg/kg. While these concentrations exceeded the RSLs and CHHSLs, the concentrations were compared to the DTSC California Background concentration of 12 mg/kg. Arsenic was not detected above the DTSC accepted California background concentration of 12 mg/kg in the soil samples analyzed (DTSC, 2008).
- Former Photo Processing Area: Kleinfelder also observed coring of the concrete floor slab near the drain to the sewer in the photo processing area and also where this line connects to the main building sewer line. One additional location was selected to be cored based on a review of the sewer diagrams and the building layout. The hand augers were then advanced through the cored holes and soil samples (BS-1, BS-2, and BS-3) were collected approximately one foot below the sewer line (approximately two to three feet below building slab). The three soil samples were analyzed for CAM 17 metals, including silver, cyanide, ammonia, pH, chloride, sulfide, sulfate, and volatile organic compounds (VOCs). VOCs were not detected in the photo processing area. CAM 17 metals were reported above laboratory reporting limits in the soil samples collected from the photo processing area. CAM 17 metals, except arsenic, were below the respective residential RSLs and CHHSLs.

- Arsenic concentrations ranged from 0.94 mg/kg to 3.6 mg/kg. While these concentrations exceeded the RSLs and CHHSLs, the concentrations were compared to the DTSC California Background concentration of 12 mg/kg. Arsenic was not detected above the DTSC established California background concentration of 12 mg/kg in the soil samples analyzed (DTSC, 2008). Cobalt was also detected in one of the soil samples; however is also within background concentration ranges possible in California. The inorganic analytical results were not considered significant.
- Former UST Area: Kleinfelder advanced two soil borings (B-3 and B-4) in the area of the former USTs located onsite using a direct push rig. B-3 was advanced to 20 feet bgs and three soil samples and one groundwater grab sample was collected. Groundwater was encountered at 16.5 feet bgs. The samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline, TPH as diesel, and VOCs including fuel oxygenates and naphthalene. Following the collection of soil samples, an additional boring was advanced within three to five feet in direction from the original boring location (SV-3) and installed to a depth of 5.5 feet bgs where a soil gas probe was installed. Boring B-4 was advanced into gravel that appeared to be the excavation backfill. Soil samples were not collected. Kleinfelder advanced a second boring (B-5) southwest of boring B-3. The soil boring was advanced to 17 feet bgs, and groundwater encountered at a depth of approximately 16.5 feet bgs. Three soil and one groundwater grab samples were collected. The samples were analyzed for TPH as gasoline, TPH as diesel, and VOCs including fuel oxygenates and naphthalene. Following the collection of soil samples, an additional boring was completed three to five feet from the boring SV-5 and a soil gas probe was installed at 5.5 feet bgs.
- Soil gas samples were collected from soil gas probes SV-3 and SV-5 and analyzed for TPH as Gasoline and VOCs by EPA Method TO-15, TPH as Diesel by EPA Method TO-17, and helium by ASTM D1946 (used as a leak detection compound).
- TPH as diesel was detected in two of the soil samples collected from the former UST area at concentrations of 1.3 mg/kg and 1.9 mg/kg. TPH as gasoline and VOCs were not detected in the soil samples. TPH as diesel was detected in one of the groundwater grab samples collected at a concentration of 120 micrograms per liter ($\mu\text{g/l}$). TPH as gasoline and VOCs were not detected in the groundwater. Several VOCs common to gasoline, as well as elevated TPH as gasoline and TPH as diesel were detected in soil gas samples collected from SV-3 and SV-5. The reported compound concentrations detected in soil gas samples were evaluated by applying a preliminary screening attenuation factor (DTSC, 2011) to a DTSC-modified air screening level (DTSC, 2013). None of the detected compounds exceeded their respective DTSC screening thresholds.
- Adjacent City of Rohnert Park Corporate Yard: Two borings (B-1 and B-2) were advanced to 15 feet bgs near the City of Rohnert Park Corporate Yard. Three soil samples and a groundwater grab sample were collected from each boring and analyzed for TPH as gasoline, TPH as diesel, and VOCs including fuel oxygenates and naphthalene. Following the collection of soil and groundwater samples, an additional boring was completed approximately three to five feet from the original boring location SV-1 and SV-2 and a soil gas probe was installed at 5.5 feet bgs. TPH as diesel ranging from 1.0 mg/kg to 2.2 mg/kg were detected in soil samples collected from soil boring B-1 completed in the area next to the City of Rohnert Park Corporate Yard. TPH as gasoline and VOCs were not detected in the soil samples collected from B-1. TPH as diesel was detected in the groundwater sample collected from boring B-1 at a concentration of 230 micrograms per liter ($\mu\text{g/l}$). TPH as gasoline and VOCs were not detected in the groundwater sample.

- Soil samples collected from boring B-2 contained detectable concentrations of TPH as diesel ranging from non-detect to 4.3 mg/kg. TPH as gasoline and VOCs were not detected in the soil samples collected from B-1. TPH as diesel was detected in the groundwater sample collected from boring B-2 at a concentration of 120 µg/l. TPH as diesel, TPH as gasoline, and VOCs were not detected in the groundwater sample.
- The soil gas samples collected from SV-1 and SV-2 contained VOCs common to gasoline as well as elevated TPH as gasoline. TPH as diesel was not detected in the soil gas samples collected from borings SV-1 or SV-2. These compounds detected in soil gas samples collected from borings SV-1 and SV-2 were evaluated by applying a preliminary screening attenuation factor (DTSC, 2011) to a DTSC-modified air screening level (DTSC, 2013). None of the detected compounds exceeded their respective DTSC screening thresholds.

Based on these results, Kleinfelder recommended the following:

- Kleinfelder did not recommend further investigation or remediation and indicated that the chemicals detected were below residential and commercial/industrial land use, and that vapor mitigation systems are not needed in the design of residential or commercial/industrial buildings that may be constructed in the vicinity of the area sampled or within the existing building's footprint. Kleinfelder recommended preparation of a soil and groundwater management plan to that can be used in the event that petroleum hydrocarbon impacted soil is encountered during future subsurface work at the property.

In response to these findings/recommendations, Leighton recommended the following additional investigation:

- One of the items noted was that two of the soil samples, SS-2-3.0 and BS-2 contained total chromium concentrations of 100 mg/kg and 270 mg/kg, respectively. Leighton recommended analyzing soil samples containing total chromium concentrations exceeding 50 mg/kg for hexavalent chromium because the RSLs and CHHSLs for hexavalent chromium are considerably lower than the total chromium thresholds. In addition, Leighton noted that the manholes were not inspected during their investigation. Leighton concurred with the remainder of Kleinfelder's findings.
- In response to Leighton's recommendations, Kleinfelder prepared an Addendum to the original Limited Phase II ESA. The results of the additional investigation are presented below:
- In December 2013, Kleinfelder prepared an Addendum to the Limited Phase II ESA. Kleinfelder revisited the subject property and collected additional soil samples in the area of SS-2 and BS-2. Five soil samples were collected from these two locations and analyzed for hexavalent chromium by EPA method 7196A. Hexavalent chromium was not detected above laboratory reporting limits in five soil samples that were analyzed. Leighton staff was onsite and observed these sampling activities. Kleinfelder did not inspect the manholes during their additional investigation.

Based on the subsurface investigation work performed by Kleinfelder, Leighton reissued their Phase I ESA with the following Findings/Opinions:

- The subject site was apparently been utilized for agricultural purposes from at least 1953 sometime before 1987. Based on a review of Kleinfelder's Limited Phase II ESA report and

Addendum, it is Leighton's opinion that the former agricultural use has not adversely affected the subject site.

- The former USTs were removed under oversight of the SCDHS and were issued closure in 1994. However, the soil samples collected during UST removal and cleanup activities were not analyzed for MTBE or other oxygenates. Based on a review of Kleinfelder's Limited Phase II ESA report and Addendum, it is Leighton's opinion that the former USTs and fuels storage and use has not adversely affected the subject site. The former USTs are considered an historical recognized environmental condition.
- The abandoned fuel oil (diesel) pipe extending from the boiler room to the location of the former USTs has not been assessed. The piping system should be exposed, flushed, and properly disposed. It may be prudent to collect soil samples beneath the pipeline.
- The 500-gallon AST and associated day tank appear to be in good condition. Leighton recommends removal of the AST, day tank, and piping system in accordance with regulatory guidelines prior to demolishing the building.
- Based on a review of Kleinfelder's Limited Phase II ESA report and Addendum, it is Leighton's opinion that the former photo-processing area has not adversely affected the subject site.
- If the irrigation water well is no longer used, the well should be abandoned in accordance with regulatory guidelines.
- Two manholes were observed in the estimation and machining room. The purpose of these manholes is not known. The manholes should be opened and inspected to assess potential impacts prior to, or during demolition activities.
- This assessment revealed no evidence of controlled recognized environmental conditions.
- Based on a review of Kleinfelder's Limited Phase II ESA report and Addendum, it is Leighton's opinion that the adjacent LUST facility has not adversely affected the subject site.

Based on these Findings/Opinions, Leighton recommended the following:

This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except for the following:

- Fuel piping abandoned in place – Piping should be exposed, flushed and properly disposed. Soil samples should be collected beneath the abandoned pipeline after it has been exposed, flushed, and removed.

The following potential recognized environment condition was also identified:

- Two manholes were observed in the estimation and machining room. The purpose of these manholes is not known. The manholes should be opened and inspected to assess potential impacts prior to, or during demolition activities.
- A groundwater well is located onsite and used for irrigation.
- While not a recognized environmental condition, Leighton recommends the following:
- If the groundwater production well is no longer to be used, Leighton recommends that the well be abandoned in accordance with regulatory guidelines.
- The grease trap/interceptor should be removed in accordance with regulatory guidelines.

- Observations should be made during the demolition of the chiller/boiler area for impacts to the subsurface.
- Hazardous materials located onsite should be removed and disposed of in accordance with regulatory guidelines.
- A hazardous materials survey should be conducted to quantify any asbestos containing materials, lead-based paint, and universal waste located onsite.
- The preparation of a soil and groundwater management plan to that can be used in the event that petroleum hydrocarbon or other impacted soil is encountered during future subsurface work at the property.

In general, observations should be made during future property development for areas of possible contamination such as, but not limited to, the presence of underground facilities, buried debris, waste drums, and tanks, stained soil or odorous soils. Should such materials be encountered, further investigation and analysis may be necessary at that time.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Michael Audibert, REPA
Site Assessment Conducted On: August 30, 2017

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 6400 State Farm Drive (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Mr. Ed Gross	Key Site Manager	(415) 577-0369	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

As the subject property is currently unoccupied, solid waste is not currently generated at the subject property. Formerly, solid waste was disposed of in commercial dumpsters and a trash compactor located immediately southeast of the building. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Rohnert Park services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Department of Agriculture; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Pacific Gas and Electric (PG&E). The mechanical system is comprised of a split system with rooftop-mounted packaged electric/natural gas split HVAC units, a natural gas-fired boiler unit, chiller units, and a cooling tower. Hot water is provided by central natural gas-fired boiler unit.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance; however, according to a prior environmental assessment, an irrigation well is located within a pump house in the northeast portion of the site. No hazardous substances or petroleum products were observed in the vicinity of the pump house. As such, the onsite irrigation well is not expected to represent a significant environmental concern.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies (cleansers and paints), cleaning compound/shampoo within a 55-gallon plastic drum, and two five-gallon containers of anti-corrosions chemicals (for chillers/cooling towers) were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Partner observed one aboveground storage tanks (ASTs) for the storage of diesel fuel on the subject property. The AST is located on the southeast portion of the subject property immediately to the southeast of the building. According to building permit records, the AST was installed in 1994 and is not equipped with secondary containment. No staining, leaks or spills were noted in the vicinity of the AST, and no releases have been reported to the local regulatory agencies. In addition, according to the key site manager, Mr. Ed Gross, the AST has been emptied and filled with cement.

No evidence of current or former USTs was observed during the site reconnaissance; however, confirmed former USTs are discussed in Sections 4.2 and 5.2.6. .

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “*Non-PCB;*” 2) 50 ppm-500 ppm – “*PCB-Contaminated;*” and, 3) Greater than 500 ppm – “*PCB-Containing.*” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. One pad-mounted transformer was observed on the subject property. The transformer is not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformer. Partner contacted a customer service representative of PG&E, who confirmed that PG&E maintains ownership and operational responsibility for the transformer and that the units do not contain PCBs. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

The subject property building is equipped with a hydraulic trash compactor and a hydraulic cardboard baler. No evidence of a release was observed around these units. Based on the lack of staining or other evidence of a release, the presence of this equipment is not expected represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, etc.) was observed on the subject property during Partner’s reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

A floor drain was observed in the boiler room that is connected to a condensate neutralizer tank system. These systems are used to neutralize acidic boiler condensate before entering the sanitary sewer system. Based on the nature of the material entering the drain, this system is not expected to represent a significant environmental concern.

No other drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

Partner noted one underground grease trap located adjacent to the west of the subject property building. Based on the non-hazardous nature of material entering the grease trap, it is not expected to represent a significant environmental concern.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are “presumed asbestos-containing material” (PACM).

The subject property building was constructed in 1976-77. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs			
Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Pipe Wrap Insulation	Boiler Room	Yes	Good
Acoustical Ceiling Tiles	Throughout Building Office Interiors	Yes	Good
Roofing Materials	Building Roof Area	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or

PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 3. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Sonoma County Water Authority (SCWA) serves the subject property vicinity. According to a representative of the SCWA, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Rohnert Park are surface water from various reservoirs associated with the Russian River watershed. According to the SCWA and the 2015 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- The subject property, identified as State Farm Insurance at 6400 State Farm Drive, is listed on various UST databases due to the former presence of diesel and gasoline USTs onsite. In 1993, two 12,000-gallon diesel USTs and one 12,000-gallon gasoline UST were removed from the site. During the removal of the northernmost 12,000-gallon diesel UST, the tank collapsed and separated. Approximately 20 to 50 gallons of diesel fuel remained in the tank which mixed with the surrounding pea gravel. Approximately 150 cubic yards of pea gravel mixed with diesel fuel was removed from the site. Eight soil samples were then collected from beneath the tank excavation and beneath the gasoline fuel product piping. Additional impacted soil was excavated and removed from the site. A total of 216 cubic yards of impacted soil was removed from the site. The SCEHD subsequently issued a closure letter regarding the former USTs on August 9, 1994. Based on the findings of a Phase I ESA performed by Leighton & Associates in December 2012, it was recommended that further investigation of the USTs was necessary to determine whether vapor intrusion would be an issue. In October 2013, a total of five soil borings were advanced and soil, groundwater, and soil vapor samples were collected. Very low concentrations of TPH-g and TPH-d were detected in soil and groundwater. Soil vapor levels were determined to be below DTSC screening levels, and no further investigation was recommended. As such, the former USTs

are considered an historical recognized environmental condition (HREC) for the purposes of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Following the removal of the former diesel and gasoline USTs from the site, the product pipeline from the diesel UST to the boiler room was capped and left in place. The former presence of the fuel tanks has been issued case closure by the local regulatory agency. However, during redevelopment, it is recommended that the pipeline be exposed and be properly disposed of. Based on observations made during this process, it may be necessary to collect soil samples from beneath the pipeline to rule out any release/subsurface impact.
- Although not observed during our current assessment, according to a prior Phase I ESA from 2012, two manhole covers were observed within the former estimation and machining room. It is recommended that during redevelopment, the manhole covers be opened and inspected to rule out the presence of a sub-grade feature such as an oil/water clarifier. If such a feature was to be discovered, it may be necessary to remove the feature and collect soil samples from beneath the feature to rule out any release/subsurface impact.
- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 6400 State Farm Drive in the City of Rohnert Park, Sonoma County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

- This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the

conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 6400 State Farm Drive in the City of Rohnert Park, Sonoma County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	NA	Latitude:	38.346519 38° 20' 47" North

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 03/09/2017 has revealed that there are 3 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

EXECUTIVE SUMMARY

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency: SONOMA COUNTY LOP
RB Case Number: 1TSO098
LOC Case Number: 00001092
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Excerpts of site history from file reports: Two underground storage tanks (USTs) were removed from the site in 1990. At the time of the tank removal, 1500 cubic yards of soil was removed from the site. The site was been investigated from 1990 through 2007 with the installation of 9 monitoring wells and 16 soil borings. 30 day HVDPE pilot test occurred from 11/4/14 through 12/4/14. 12 monitoring wells have been installed at the site. 3 monitoring wells have been destroyed. 9 monitoring wells remain. The site meets the Low Threat Closure Policy as follows: All General Criteria are met. Groundwater Specific Criteria is met by criteria 5. Vapor Intrusion to Indoor Air Criteria is met by criteria 2a scenario 3b. Direct Contact and Outdoor Air Exposure Criteria is met by criteria 3a. Remediation History: Approximately 1,500 cubic yards were excavated and properly disposed of from 7/31/90 through 8/5/90. Approximately 4,500 gallons of groundwater was pumped from the excavation on 8/13/90 and properly disposed of. High Vacuum Dual Phase Extraction occurred from 11/3/14 through 12/4/14. Approximately 79,630 gallons of groundwater was removed and properly disposed of removing 3.6 pounds of contamination from groundwater. Approximately 730 pounds of hydrocarbon vapor was removed during this event. Site Management Requirements: Contingency planning is required for worker safety and waste disposal if excavating in areas of residual contamination. The Building Department has been notified. Newly proposed water supply wells may require siting and design by a qualified professional engineer or geologist. Sonoma County Permit and Resource Management Department has been notified. A Soil and Groundwater Management Plan has been submitted and is on Geotracker. SITE CLOSED 2/17/17.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: Excerpts from "Case Closure Request" (Conestoga-Rovers & Associates, April 4, 2008) SITE BACKGROUND The subject site is an active Chevron service station located on the northwest corner of the intersection of Rohnert Park Expressway and Redwood Road, in Rohnert Park, CA (Figure 1). Land use in the vicinity is primarily commercial. Adjacent properties to the west and north include a Valero service station with a car wash and a Chevron Quick-Lube facility, respectively. In 1996 the product lines and dispenser islands were removed and replaced. Conditions encountered are detailed below. Ten groundwater monitoring wells associated with the site have been installed to monitor dissolved hydrocarbons. Chevron site structures include a station building, a restroom building, five dispenser islands and three gasoline underground storage tanks (USTs). Chevron site structures, monitoring wells and surrounding properties are presented in Figure 2. Previous Investigations 1996 Product Line and Dispenser Soil Sampling: In September 1996, Touchstone Developments Inc. (Touchstone) oversaw the upgrade of the dispensers and product lines. Ten soil samples were collected during the upgrade activities. Nine samples contained petroleum hydrocarbons in the area of the former pump islands to depths of three feet below grade (fbg). Total petroleum hydrocarbons as gasoline (TPH-g), benzene, toluene, ethylbenzene and xylenes (BTEX), and MTBE were reported in samples from the product line excavations. Sample PI contained the highest hydrocarbon concentrations with 500 mg/kg TPHg, 0.3 mg/kg benzene, and 53mg/kg MTBE. Approximately 200 cubic yards of soil and pea gravel excavated to replace product lines were removed from the site. The minor impacts to soil did not warrant over-excavation. Product

line removal is detailed in Touchstone's December 1, 1996 Product Piping Removal Soil Sampling Report. 1997 Well Installation and Sensitive Receptor Survey: In November 1997, Gettler-Ryan Inc. (Gettler-Ryan) installed monitoring wells MW-1 through MW-3 to delineate groundwater in the vicinity of the former pump islands. Soil samples were collected from each boring and submitted for analysis of BTEX, TPHg and MTBE. No hydrocarbons were detected in soil or in the initial groundwater samples. As part of this same investigation, Gettler-Ryan identified sensitive receptors area within a 1/4-mile radius. A total of three municipal wells and one irrigation well were identified just within the 1/4-mile radius limit. Three of the wells were up-gradient of the site, and one well was located down-gradient (northwest). This investigation is detailed in Gettler-Ryan's February 20, 1998 Well Installation and Sensitive Receptor Survey Report. 2000 Monitoring Well Installation: In September 2000, Delta Environmental Consultants, Inc. (Delta) installed monitoring wells MW-4 and MW-5 to characterize MTBE in groundwater down-gradient of MW-3. MTBE had been reported during sampling events as early as August 1998. The only hydrocarbons detected in soil were 3.89 mg/kg TPHg at 11 fbg and 0.13 mg/kg MTBE at 16 fbg, both in MW-4. MTBE and tertiary amyl methyl ether (TAME) were the only analytes detected in groundwater from MW-4 and MW-5. The well installations are detailed in Delta's Monitoring Well Installation Report, dated January 10, 2001. 2004 Monitoring Well Installation: In May 2004, Cambria Environmental Technology, Inc. (Cambria) advanced soil boring SB-1 and installed monitoring wells MW-6 and MW-7 to further delineate the MTBE plume at the site. No TPHg or BTEX were detected in soil from the three borings. MTBE was detected in all three borings at concentrations ranging from 0.002 to 0.51 mg/kg. Only 0.7 ug/L toluene and 54 ug/L MTBE were detected in the grab-groundwater sample collected from SB-1. The investigation is detailed in Cambria's Well Installation Report dated June 11, 2004. 2006 Monitoring Well Installation: In January 2006, Cambria installed monitoring wells MW-8 and MW-9 to further define the extent of MTBE in groundwater. No TPHg or BTEX were detected in soil samples collected from the well borings. MTBE was detected in soil samples collected at 10 and 15 fbg from MW-9 at 0.006 and 0.057 mg/kg, respectively. No TPHg or BTEX was reported in groundwater from either well. MTBE was reported at 5 ug/L in MW-8 and 170 in MW-9. The only other oxygenate or fuel additive detected was 1 ug/L TAME in MW-9. Well installations are detailed in Cambria's Subsurface Investigation Report, dated February 16, 2006. 2007 Monitoring Well Installation: In May 2006, CRA installed well MW-10 to define the down-gradient extent of MTBE in groundwater. No hydrocarbons or oxygenates were detected in soil or groundwater from MW-10, therefore defining the down-gradient extent of the dissolved MTBE plume. The well installation is detailed in CRA's Well Installation Report, dated August 13, 2007. Additional Notes by Sonoma County EHS staff: The site is doing verification monitoring. Closure has been requested and is being considered. Case closed on 2/13/2013.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Two 10,000-gallon and one 5,000-gallon gasoline USTs, one 2,000-gallon fuel-oil UST, and one 550-gallon used-oil UST were installed (GTI, 1987a). December 1986 Groundwater Technology, Inc. (GTI) observed the removal of five steel USTs (one used-oil UST, one fuel-oil UST, and three gasoline USTs). A new double-walled fiberglass UST was installed near the location of the former fuel-oil UST west of the station. Three new gasoline and one new diesel double-walled USTs were installed in a new tank pit north of the dispenser islands (GTI, 1987a). March -June 1987 GTI observed Sierra Pacific install six monitoring wells (MW1 through MW6). Due to construction problems, monitoring well MW1 was destroyed (GTI, 1987b). March 1989 GTI observed Sierra Pacific install four monitoring wells (MW7, MW8, MW10, and MW11). In addition, one soil boring (B9) was drilled and sampled (GTI, 1988). March 1989 GTI observed Sierra Pacific install five monitoring wells (MW12A, MW12B, MW13A, MW14A, and MW14B) and destroy monitoring well MW3 (GTI, 1990). January 1990 GTI observed Sierra Pacific install six monitoring wells (MW15A, MW15B, MW16A, MW16B, MW17A, and MW17B)(GTI, 1990). November 1991 Science and Engineering Analysis Corporation (SEACOR) observed the installation of test wells TW1 and TW2. SEACOR performed 72-hour pump tests on each of the two test wells (SEACOR, 1992). SEACOR concluded that maintaining a maximum pumping rate of 2.8 gallons per minute (gpm) in well TW1 and 1.8 gpm in well TW2 would result in a capture zone that encompassed the entire site. July 1994 ERI observed Gettler-Ryan remove and replace the hoists, used-oil UST, product lines, and dispensers (ERI, 1994). December 1995 Eleven soil borings (B1 through B11) were advanced (PEG, 1996a). October 1996 Monitoring wells MW18A, MW18B, and MW19 were installed (PEG, 1996b). 2000 ERI conducted a sensitive receptor survey (SRS) for the subject site (ERI, 2000). ERI performed a well survey by reviewing available California Department of Water Resources (DWR) data within a 2,000-foot radius of the site from the well driller's report archive. DWR archives contained reports for three municipal wells and four private wells within the search radius. One surface water body

(Hinebaugh Creek) was located north of the site. August 2001 To prevent migration of dissolved-phase hydrocarbons from the upper water-bearing zone to the lower-water bearing zone, ERI observed the destruction of monitoring wells MW4 through MW8 and MW10 and test wells TW1 and TW2. In addition, ERI observed the installation of monitoring wells MW20A and MW20B downgradient from the site (ERI, 2001). November 2003 - April 2004 ERI evaluated the subsurface conditions for natural attenuation of petroleum hydrocarbons (ERI, 2004). July 2005 ERI observed Gregg Drilling, Inc. (Gregg), of Martinez, California, advance six single-wall direct-push soil borings (B12 through B15, B17 and B18) to a depth of 20 fbg and one dual-wall direct-push soil boring (B16) to a depth of 27 fbg (ERI, 2004). April - May 2006 ERI observed Woodward Drilling Company (Woodward), of Rio Vista, California, advance borings DP1 through DP5 to a depth of 35 fbg using dual-wall direct-push technology. In addition, ERI observed Gregg advance six cone penetration test (CPT) borings (CPT1 through CPT6) and six Hydropunch-type (HP) borings (HP1 through HP6), each to a depth of 35 fbg. The borings were advanced north, northwest, and west of the existing USTs (ERI, 2006b). December 2006 ERI observed Woodward install groundwater monitoring wells MW21A and MW21B, screened in the lower and upper water-bearing zones, respectively. In addition, ERI observed Gregg advance one CPT boring (CPT7) and one HP boring (HP7), each to a depth of approximately 72 fbg. The borings were advanced west of the existing USTs (ERI, 2007a). 2007 ERI conducted an annual update to the SRS. ERI confirmed the existence of nine active municipal wells within 1,500 meters of the site. The closest municipal well is located approximately 1,300 feet northeast of the site. The closest downgradient municipal well is located approximately 1,800 feet southwest of the site. Private water wells are not located within 300 meters of the site. The City of Rohnert Park Public Works Department (Public Works) prohibits domestic water wells within city limits. Hinebaugh Creek is located approximately 950 feet north of the site. According to information provided by Public Works, storm drains in the site vicinity discharge into Hinebaugh Creek. April 2007 ERI observed Gregg advance one CPT boring (CPT8) and two HP borings (HP8S and HP8D) to depths of approximately 80 fbg. ERI collected grab groundwater samples from boring HP8S at depths of approximately 14 fbg, 27 fbg, 50 fbg, and 62 fbg. In addition a single grab groundwater sample was collected from boring HP8D a depth of approximately 74 fbg. (ERI, 2007b). [End] Additional information: ERI conducts semi-annual groundwater monitoring and sampling at the site. February 10, 2005 Monitored Natural Attenuation was accepted as remediation but additional investigation was required. April 28, 2010 Remediation must be reevaluated. AS/DPE is not shown to be effective in 1/28/11 report. Natural Attenuation Parameters will be evaluated for consideration of chemical injection. 10/12/12-File is reviewed for Low Threat Closure Policy (LTCP) but does not meet the media specific criteria for groundwater as the MTBE plume is not well defined off site and the site is within 1,000 feet of a surface water body (Hinebaugh Creek, ~760 feet north). Direct contact/outdoor air exposure for utility worker criteria is not met. Benzene levels in the upper 10 ft. exceed Table 1 value. The consultant proposes air sparge and dual-phase extraction. Site Closed on 6/13/14.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Corrective Action Summary:

Event date: 12/15/1989
Event: CMS Imposition

Event date: 12/15/1989
Event: RFI Imposition

Event date: 09/17/1990
Event: RFA Completed, Assessment was an RFA.

Event date: 09/17/1990
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 09/17/1990
Event: RFA Completed

Event date: 03/15/1991
Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).

Event date: 07/24/1991
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 07/24/1991
Event: CA029WQ

Event date: 07/24/1991
Event: CA049PA

Event date: 11/11/1991
Event: Stabilization Construction Completed

Event date: 01/13/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 03/31/1992
Event: RFI Workplan Approved

Event date: 09/30/1992
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 09/30/1992
Event: Stabilization Measures Evaluation, This facility is amenable to stabilization activity based on the status of corrective action work at the facility, technical factors, the degree of risk, timing considerations and administrative considerations.

Event date: 09/30/1992
Event: Stabilization Measures Evaluation, This facility is amenable to stabilization activity based on the status of corrective action work

at the facility, technical factors, the degree of risk, timing considerations and administrative considerations.

- Event date: 08/20/1993
Event: RFI Report Received
- Event date: 08/29/1994
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.
- Event date: 11/24/1997
Event: Igration of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.
- Event date: 11/24/1997
Event: CA Responsibility Referred To A Non-RCRA Federal Authority
- Event date: 11/24/1997
Event: Igration of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.
- Event date: 11/24/1997
Event: Current Human Exposures under Control, More information is needed to make a determination.
- Event date: 11/09/2000
Event: Current Human Exposures under Control, More information is needed to make a determination.
- Event date: 11/09/2000
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.
- Event date: 01/23/2001
Event: Current Human Exposures under Control, More information is needed to make a determination.
- Event date: 01/23/2001
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.
- Event date: 09/25/2002
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.
- Event date: 09/25/2002
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. changes at the facility.

Event date: 09/25/2002
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/25/2002

Agency Type: Private

SIC Code: 7389

SIC Code 2: Not reported

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Primary Waste: STORMS

Waste Type2: Not reported

Waste2: Stormwater Runoff

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Secondary Waste: Not reported

Secondary Waste Type: Not reported

Design Flow: 0

Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

S100539015

Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA

Date Made Active in Reports: 05/12/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704

Number of Days to Update: 92	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 07/21/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/30/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Number of Days to Update: 44	Next Scheduled EDR Contact: 10/09/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/28/2016	Source: Department of the Navy
Date Data Arrived at EDR: 01/04/2017	Telephone: 843-820-7326
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 08/10/2017
Number of Days to Update: 93	Next Scheduled EDR Contact: 11/27/2017
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 05/31/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 09/11/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

UTM X (Meters):	525939.1
UTM Y (Meters):	4244098.5
Elevation:	103 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5602420 COTATI, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
COTATI	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	38 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 5.6
2	38 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX D: QUALIFICATIONS/INSURANCE

Michael Audibert, REA

Partner Associate

Education

MPA - Public Administration, San Francisco State University, 2000

BS - Business Administration, University of Vermont, 1992

Registrations

California Registered Environmental Assessor (REA) #30090

Summary of Professional Experience

Mr. Audibert has nine years of experience in the health, safety, and environmental (HSE) and industrial hygiene (IH) service industries. He has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Audibert has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II Subsurface Investigations, Regulatory Compliance Assessments, Asbestos Surveys, Lead-based Paint Surveys, Radon Studies, Mold Assessments, and Lead-in-water sampling and analysis.

Mr. Audibert performed a Phase I Environmental Site Assessment (ESA) for a former steel and brass foundry to be converted into live/work loft apartments. The City of Oakland required that a comprehensive Phase I ESA be conducted for this property for foundry closure purposes. This project involved extensive agency and historical research, as well as determining what areas of the former foundry would be considered "at risk zones" for subsurface contamination.

Mr. Audibert has performed Phase I Environmental Site Assessments (ESAs) for existing gas stations developed on the site of former gas stations, as well as several historical and current leaking underground storage tank (LUST) sites, which involve an extensive historical use investigation and agency records review to determine the status of current and past underground storage tanks (USTs).

Finally, Mr. Audibert's diversity across residential, industrial, municipal, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the West, Southwest, and Pacific Northwest region of the United States.

Education

A.S. in Fire Science Technology, College of San Mateo

B.A. in Environmental Studies, California State University, Hayward (Cal State East Bay)

Registrations

Registered Environmental Property Assessor (REPA) with the National Registry for Environmental Professionals, Cert. #615601

Training

Wood Destroying Pest Certification

Lead Based Paint and Asbestos trained

Sustainable/Green Business trained

Property Condition Reports

Experience Summary

Mr. Petersen has over 20 years of experience in the environmental consulting industry and has worked in various disciplines, including: site mitigation, environmental health and safety, regulatory compliance, construction monitoring, subsurface investigation, and environmental and engineering due diligence practices, including Phase I ESAs and PCAs. Mr. Petersen's primary area of expertise is in the environmental due diligence field, where he has performed and managed thousands of environmental due diligence projects throughout the country.

Mr. Petersen has conducted and managed Phase I ESAs on open space, agricultural land, industrial facilities, office buildings and complexes, multi-family developments, government installations, public right-of-ways, shopping malls, retail strips, telecommunication tower sites, service stations, drycleaner facilities and hospitality properties. Most notably, Mr. Petersen has managed due diligence portfolios for varied and demanding clients. In addition to these duties, Mr. Petersen has developed scopes of work, prepared proposals, managed, mentored and trained junior staff, and has regularly provided detailed reports within strict deadlines.

Mr. Petersen is familiar with all aspects of due diligence property assessments and reporting standards, including Fannie Mae DUS and Freddie Mac HUD, and is especially knowledgeable on EPA's All Appropriate Inquiry and ASTM E1527-05. In addition, he has worked with diverse client groups with unique client-specific scopes of work and reporting requirements.

Mr. Petersen has completed thousands of Phase I ESAs on multi-family properties, commercial office buildings, shopping centers, gasoline stations, hotels, dry cleaners, auto repair shops, and industrial facilities. Areas of concern included former chemical storage/transfer areas, areas of drainage/deteriorated piping, historical groundwater dispersion wells, and former underground storage tanks systems.

Thomas Petersen, REPA

Mr. Petersen has reviewed and evaluated hundreds of third-party Phase I reports.

Currently, Mr. Petersen provides management and QA/QC expertise of Phase I ESAs, transaction screens, and other product types, and is extensively involved in project management and client communications, maintaining an emphasis on providing exemplary client service. Mr. Petersen is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. In addition, Mr. Petersen also provides research on specific markets in order to support growth of Partner's expanding client base.

Project Experience

Mr. Petersen has worked with national and regional lenders, banks, investors, equity stakeholders, industry, local governments and property owners, including, but not limited to:

- Bank of America
- Deutsche Bank
- City of San Carlos
- Applied BioSystems
- NorthMarq Capital
- Wells Fargo
- Terra-Gen Power
- Morgan Stanley
- EastWest Bank
- Genentech
- Met Life
- ReGen
- US Bank
- GE Capital
- American Tower
- Legacy Partners
- SR Commercial
- ClubCorp
- NetREIT

Finally, Mr. Petersen's role of managing projects across industrial, residential, retail, and commercial environments, as well as his diverse project experience, is a major contribution to Partner Engineering and Science's Project Management team.
