excluding water which, upon determination by the City Engineer, is found to not be discharged to a sanitary sewer.

If deemed appropriate by the City Engineer and Finance Director charges may be based on metered consumption between the period of November 1 and April 30.

The minimum monthly charge shall be \$36.50.

3. **Industrial**: A usage based on measured discharges in accordance with the following:

Metered water usage or effluent discharge shall be the billing base for flow and volume charges. Biochemical oxygen demand (BOD) and suspended solids (SS) strengths will be based on laboratory analysis of the discharge to the sewer from the premises. Such analysis shall be conducted at least annually by the City with all costs paid by the user.

A unit rate per volume of discharge will be developed for each industrial connection to the sewer system.

The minimum monthly rate shall be the same as for "Commercial-Others" which is \$36.50 monthly.

The charge will be adjusted if any substantial change occurs in the amount of the maximum flow or characteristic of the discharge.

Bi-Monthly rates will be double the monthly rate.

Special Rates The City Council may enter into written agreements for rates other than those listed when special conditions or circumstances make the listed rates inapplicable.
